a treat

BLENDED POLYMERS

Compatible with all pool treatments

**Pack sizes available
1L, 2L, 5L, 20L**

POOL CLARIFIER directions:

Lack of sparkle or cloudiness in spa and swimming pools is caused by tiny suspended particles in the water, usually caused by either insufficient filtering or prolonged low levels of treatment. **POOL CLARIFIER** brings back the sparkle by helping the filter system remove the particles as an entrapped material in the filter.

- 1ST** Backwash the filter, then to quickly remedy a cloudy pool, switch to continuous filter operation.
2ND Add Pool Clarifier. Dilute in a bucket of water and distribute evenly over the pool.

MAKES THE FILTER DO THE WORK

mLs of Pool-Clarifier	SLIGHTLY CLOUDY	POOL VOLUME LITRES	VERY CLOUDY BOTTOM JUST VISIBLE	mLs of Pool-Clarifier
	300	60,000	600	
	250	50,000	500	
	200	40,000	400	
	150	30,000	300	
	100	20,000	200	
	50	10,000	100	
	halfCap	SPA	CAP	

LITRES = gallons x 4.5

3RD Shock dose with chlorine. Preferably Pool-Treat Liquid Chlorine

4TH Check and maintain an ideal chlorine level, with at least 1 to 3 ppm chlorine. Also ensure sufficient daily filtering to obtain & maintain a sparkling clear pool.
